For my project, I used ChatGPT to generate the image because it provides clear, step-by-step instructions, making it easy to follow along and customize the output. Unlike some other AI tools that generate images directly, ChatGPT helped me understand the process behind image creation, allowing me to modify the prompts and code as needed.

I chose ChatGPT over other models like CoPilot or Gemini because of its structured guidance. While other models might provide quick results, ChatGPT's approach gave me more control and insight into how AI-generated images work. It was particularly useful in explaining the logic behind the steps, which helped me troubleshoot any issues that arose during the process.

The final image was close to what I expected, though there were some surprises in how certain elements turned out. AI-generated content often includes unexpected variations, which can be both exciting and challenging. This experience reinforced the importance
